

## WRAPPING LINERS

# WRAP/GAS/PRESERVE

Wrapping liners allow you to wrap pallet-size stacks or big bags, and quickly modify the atmosphere in combination with the vQm HS or XL machine. This allows you to quarantine your incoming goods, eradicate infestations inside (if needed) and avoid moisture, oxygen, smell or other external conditions to spoil the quality of your product.

Wrapping liners are used to solve a range of issues:

- Eradicate infestations by (preventive gassing with CO<sub>2</sub>); also suitable for organic products
- Avoid reinfestations
- Keep optimum moisture content
- Avoid oxidation or rancidity
- Stop bacterial developments
- Keep the product & your warehouse clean
- Avoid smell or aroma's to effect the product

Standard wrapping liners are made from an extreme, 7-layer barrier film (PA/PA/EVOH/PA/PE), 200μ thick with supreme elongation, puncture resistance and is easy to seal (2 layers with hand held impulse sealer)

**QUARANTINE**  
**ERADICATE**
