## VQM HEAT SEALER **SEALED TO PERFECTION**

These heat sealing tongs can be used for sealing FIBC aluminum big bags.  
The temperature can be adjusted, and both sealing bars  
are heated providing efficient heat distribution.

This sealer is very easy to operate.  
The jaws are closed by hand and then  
released once sealing is complete.  
The comfortable insulated grip of the  
machine keeps the handle cool even  
when the temperature of the jaws  
rises to 250 °C.

### Technical specifications

Sealing length	300-420 mm
Sealing width	10 mm
Sealing jaws	PTFE Coated
Weight	1,25 - 1,35 kg
Consumption	450 W
Power supply	230 V - 50/60 Hz
